Encouraging Citizen Engagement Using Arist-Led Innovation

VOICE CONCEPT

UNDERSTANDING

LANDSCAPE

MAPPING

ATSI >

KNOWLEDGE

VALORISATION

The project is based on four pillars:

- (1) Understanding the landscape
- (2) Mapping
- (3) Capacity building
- (4) Arts-technology-society interactions (ATSI) for knowledge sharing.

Project team will gather information about CAPACITY communities, issues, stakeholders, and BUILDING technologies using methods like the Inclusive Design Framework and permaCultural (pCr) resilience praxis. This foundation supports goals related to digital and green tools, community support, and adoption of new products and services.

Next, the project team will map projects and initiatives of consortium partners in Europe using digital tools to encourage knowledge sharing and community engagement.

VOICE integrates expertise into a collective repository for building skills and promoting sustainability. It fosters new literacy through interdisciplinary approaches and encourages participatory technology and solution design.

ATSI involves artists creating interventions based on community needs, sharing innovative practices, and generating project value.

KEY OBJECTIVES

Spark

Meaningful

Change

Generate Knowledge Together

Depart from Traditional Solutions

Promote the Use of Critical Approaches

Reshape the Future of Environmental Sustainability

SDG 11 aims to make cities and human settlements inclusive, safe. resilient, and sustainable.

SDG11. Sustainable Cities and

Communities

SDG12. Responsible **Consumprtion and Production**

SPECIFIC OBJECTIVES USING SUSTAINABLE **DEVELOPMENT GOALS**

> SDG 11 aims to make cities and human settlements inclusive, safe. resilient, and sustainable.

SDG13. Climate Action

SDG 13 emphasizes urgent action to combat climate change and its impacts.

SDG13. Climate Action

SDG 17 underscores the importance of global partnerships and cooperation to achieve the Sustainable Development Goals.
